chart and Jira

## PROFILE

I am a passionate and results-oriented UI developer with 2 years of experience crafting user-friendly and visually appealing interfaces for web and mobile applications. Proven ability to translate design mockups into clean, responsive code using HTML, CSS, JavaScript and Ionic. Skilled in collaboration with designers and developers to deliver high-quality products on time and within budget.

## PROFESSIONAL EXPERIENCE

### Single point solutions

UI developer

Hyderabad, Telangana

#### **Project: Mana TDP**

##### **Project Description:**

Mana TDP is a Social Media Content Hub Built with Ionic designed for users to share and discover creative content in various formats:

- Audio: Users can share podcasts, music, or voice recordings.
- Video: Users can upload short clips, tutorials, or entertaining videos.
- Text: Users can express themselves through creative writing, poems, or insightful quotes.
- Image: Users can share photos, artwork, or visual stories.

The app also offers an integrated daily e-newspaper, keeping users informed about current events.

#### **Project: Single Point Solutions Website Design**

- Designed and developed a website for Single Point Solutions, a software development outsourcing company.

- Highlighted the company's services including web application development, mobile app development, data engineering, artificial intelligence, and machine learning.
- Crafted a user-friendly and informative website to showcase Single Point Solutions' expertise and capabilities.

### **Project: Volta Cabs Website Design**

Designed and developed a website for Volta Cabs, a ride-booking app company. Highlighted Volta's unique selling propositions (USPs) such as:

- Zero commission for drivers and riders
- Fares with no hidden charges
- 24/7 customer support
- Commitment to safety for both riders and drivers

Crafted a user-friendly and informative website to showcase Volta Cabs' services and the benefits they offer to both riders and drivers.

### **Your Volta services**

UI Developer

10/2023 – 02/2024 | Hyderabad, Telangana

#### **Project Title: Volta Ride-Sharing App (UI/UX Design)**

##### **Description:**

Designed a user-friendly and intuitive UI for the Volta ride-sharing app using ionic and Adobe XD, facilitating a seamless experience for booking rides with various options like electric and fuel-powered vehicles.

Contributed to the user experience (UX) by focusing on aspects like:

- Clear information architecture for easy navigation and ride booking.
- User-friendly interface for requesting specific vehicle types (electric/fuel).
- Visually appealing design promoting the app's focus on safety and eco-friendliness .

using Adobe XD I have tackled and Leveraged Adobe XD's prototyping capabilities to create interactive prototypes that allowed for user testing and refinement of the in-app trip booking flow.

using the Ionic for the UI I have tackled the bottom sheet and the ride selection screen contains many features like coupons, payment mode , ride for other , ride later and vehicle selection with map I have fixed it with using the minute spaces and by designed complex grids that suitable for responsive.
