SUMMARY

I'm a dedicated UI developer with **Three years six months of experience** creating user-friendly, visually engaging interfaces for web and mobile applications. Recently, I expanded into **UX design**, working under guidance for five months to design intuitive user experiences. I specialize in building **responsive, high-quality UIs** using **Ionic, Bootstrap, Tailwind, and JavaScript libraries**. I enjoy collaborating with designers and developers to bring projects to life, ensuring each product meets quality expectations and is delivered on time.

WORK EXPERIENCE

VSAAS Technologies   **Gachbowali,Hyderabad**

UI/UX Developer   *Mar 2024 - Present*

- Designed a **user-friendly admin interface** for managing accounts, workout plans, and fitness tracking with seamless navigation.
- Developed a **modern company website** to showcase services effectively with a clean, intuitive design.
- Contributed to the **UX design of a government portal**, enhancing accessibility and usability for exam and promotion information.

Your Volta services   **One West - A Terminus Project, Hyderabad**

UI/UX Developer   *Oct 2023 - Mar 2024*

- Designed **user, driver, and admin interfaces** for the ride-sharing app using **Ionic and Adobe XD**.
- Developed an intuitive **ride-booking experience** with options for electric and fuel-powered vehicles.
- Created a clear **information architecture** for seamless navigation across all app interfaces.
- Utilized **Adobe XD and Figma** to design interactive prototypes and UX for the native version.
- Implemented **responsive UI elements**, including a bottom sheet for ride selection with coupons, payments, scheduling, and map integration.

Single point Solutions   **One West - A Terminus Project, Hyderabad**

UI Developer   *Oct 2021 - Oct 2023*

- Designed **Mana TDP**, a social media content hub, enabling seamless sharing of audio, video, text, and images using **Ionic**.
- Developed **admin and partner websites**, ensuring intuitive navigation and clear presentation of company services.
- Focused on **enhancing user experience**, optimizing layouts, and improving content accessibility across platforms.

PROJECT EXPERIENCE

101 Fitness

UI Design

- Focused on creating a clean and intuitive admin interface that allows administrators to easily navigate through user data, workout schedules, and performance metrics.
- Prioritized features that streamline administrative tasks, enabling quick access to important functionalities like user management, report generation, and content updates for fitness programs.
- Collaborated with other team members to gather feedback and iterate on the design, ensuring that the admin interface not only met the functional requirements but also provided a positive user experience for administrators.

VSAAS Technologies

UI/UX Design

- Focused on creating a clean, modern, and user-friendly single-page website that effectively communicated the company's services and values.
- Worked on enhancing the user experience for the government portal, considering the needs of users seeking information about appraisal and promotion exams.
- Collaborated closely with my team to gather feedback and refine our designs.

Volta Ride-Sharing App

UI/UX Design

- Created a clear information architecture to facilitate easy navigation and ride booking across all app interfaces.
- Developed user-friendly UI designs for the user and driver apps, enhancing the selection process for specific vehicle types (electric/fuel).
- Focused on creating visually appealing interfaces that reflect the app's commitment to safety and eco-friendliness.
- Utilized Adobe XD's prototyping features for user testing and iterative refinement of the visual trip booking flow.
- Implemented responsive UI elements in Ionic, optimizing layouts through complex grid designs.

Volta Cabs Website

UI/UX Design

- Crafted the website to highlight key benefits, such as zero commissions for drivers and riders, transparent fares with no hidden charges, and 24/7 customer support.
- Created an informative and engaging platform that clearly presents the benefits offered to both riders and drivers.

Mana TDP

UI Design   *Oct 2023 - Feb 2024*
- Developed an intuitive UI that allowed users to share and discover various content types, such as audio, video, text, and images.
- Incorporated features for an integrated daily e-newspaper, ensuring users stayed informed about current events while exploring creative content.

Single Point Solutions Website

UI Design

- Focused on clearly presenting our offerings in web application development, mobile app development, data engineering, artificial intelligence, and machine learning.
- Designed a clean and informative layout that enhances user experience.

SKILLS & INTERESTS

Skills: Front-End Development: HTML, CSS, JavaScript;
UI Frameworks: Ionic, Bootstrap;
Design: Responsive Design, Accessibility Standards WCAG, UI/UX Design Principles;
Version Control: Git;
Tools: Adobe XD, Miro board, Lucid chart, Jira

EDUCATION

V R Siddhartha Engineering College   Vijayawada, Andhra Pradesh
Bachelor of Technology (B.Tech)   *Graduation Date: May 2019*

Narayana junior college   **Hyderabad, Telangana**
Higher Secondary School   *Graduation Date: Apr 2015*

Springs high school   **Hyderabad, Telangana**
Secondary School   *Graduation Date: Mar 2013*
